ABOUT ME

Full Stack Developer with 1 year of professional experience building and maintaining web applications. Works across the stack with React.js, JavaScript and Tailwind CSS on the frontend, Node.js, Express.js and REST APIs on the backend, and MySQL for data. Turns client requirements into working features, tracks down and fixes reported bugs, tests changes, and improves existing applications.

WORK EXPERIENCE

Full Stack Developer

Oct 2025 – Present

Parix.AI

- Build new features and maintain existing web applications across the frontend and backend.
- Develop responsive interfaces that work properly on desktop and mobile screens.
- Write backend logic and integrate REST APIs to connect the frontend with application data.
- Work with SQL databases to store, query and update the data behind business workflows.
- Debug and fix reported issues in both frontend and backend code to keep applications running smoothly.
- Test new features and changes to confirm they behave as expected.
- Turn client requirements and change requests into working features and improvements.
- Work with the team to plan and complete development tasks, and use AI coding tools to speed up development and debugging.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2025

University of Sindh, Mirpurkhas Campus
